

## JOIN OUR TEAM

### Construction Administrator

MMW Architects is seeking a Construction Administrator. MMW Architects is an established, respected Architecture Firm in Missoula, MT. We provide an inclusive environment for all employees and believe in the celebration of diversity in our firm and our work. Please see our website for more information: [mmwarchitects.com](http://mmwarchitects.com).

The Construction Administrator will be a liaison between our design professionals, consultants, contractors, clients, and governmental authorities. It is important that they can communicate clearly and collaborate with multiple project stakeholders. They will be responsible for reviewing and interpreting requirements of construction documents. They must be familiar with sustainable design strategies. Prior to construction they will conduct document coordination and constructability reviews. During construction they will coordinate RFI, ASI, PR, PCO and CO documents, create reports of construction progress and projects activities, and monitor closeout submittals.

### Job Qualifications

Proven architectural, construction and technical experience, with an understanding of codes and contract documents. Strong verbal and written communication skills. Ability to research and troubleshoot. Strong organizational skills. Knowledgeable in construction materials, methods and practices. Well versed in building permitting and working with governmental authorities such as building departments during permitting and construction.
